

# Brula

---

From the feral world of Tygress III, Brula was a medicine woman for her tribe. Like all her kind, she is used to a brutal existence, life often short and bloody with fights over meagre supplies with neighbouring tribes. With her growing psychic abilities, she was able to help those wounded she could, but all too often, failing and causing an all too dramatic ending to the lives she tended. If nothing else, it added to her reputation as a woman to be feared.

Her life was forever changed with the arrival of the black ships and the long, painful initiation into the ranks of sanctioned psykers.

Now released into society, she retains much of her feral nature.
