

# Edinburgh University

---

Edinburgh University still exists, although their class numbers are much reduced. Miraculously, many of their older buildings were untouched although the facilities at King's Buildings suffered a recent accident, and Crichton Street and many of the buildings nearby were obliterated by a Migou null-bomb during the Arcanotech Wars.

Science subjects are favoured, with many sponsorship programs from corporations such as the Ashcroft Foundation and Chrysalis Corporation. However, it is also a recruiting ground for the next generation of NEG soldiers and recruitment posters dot the campus, especially during Freshers week.
