

Stormwrack Keep

These foreboding ruins have a sinister reputation. The former Baron of the region was believed to have dabbled in the dark arts, and there were disappearances that resulted in a mob burning the keep to a gutted, blackened shell. Locals believe it haunted, and report hearing maniacal laughter from within the keeps' depths. Some foolhardy souls make wagers to spend the night within, and sometimes they do not return from the blackened chambers of this ruin.
